Lab Objectives	2
Exercise – Copying Workflow Agents for Agentic Apps	3

Lab Objectives

In this lab, participants will download an existing agent team, import a copied version of the agent team, and test the agent team that will be used to power the Agentic Apps

By the end of this lab, participants will be able to:

- Download an agent team
- Change the name and workflow code of the agent team
- Import the copied agent team
- Test the agent team

Exercise – Copying Workflow Agents for Agentic Apps

In this exercise, we will clone existing workflow agents to power our agentic apps.

Login to the lab environment using the credentials provided. **Make sure to use your assigned user.**

- In **AI Agent Studio**, go to the **Agent Teams** tab and search for **AICOE** within the **published** agents. Look for the below 3 agents with that prefix
 - AICOE Deal Risk Agent
 - AICOE Passport Audit
 - AICOE Talent and Comp Review

For each of these **3 agent teams**, follow the below instructions:

- Click to download the agent team JSON file. Then click **export**.

Agent Team Name	Description	Agent Team Code	Family	Product	Type	Version	Created By	Custom Agent...	Tags	Actions
AICOE Deal Risk Agent	The Deal Risk Agent looks at opportunity activity through a risk lens. It identifies stalled opportunities, overdue deals, and competitive threats, helping sales leaders quickly understand where revenue is at risk and where follow-up urgency is highest. Instead of tracking every opportunity, it highlights the deals that need attention most, using severity signals such as STALLED, OVERDUE, and COMPETITIVE to surface the highest-risk opportunities for review.	AICOE_DEAL_RISK_AGENT	CX	Sales Force Automation	Workflow	30	Curtis Feitty	✖		
AICOE Passport Audit	You are an HR specialist focused exclusively on monitoring passport and work-permit expiration dates. Your role is to review only the data provided to you and respond strictly to questions related to document expiration, upcoming deadlines, and required follow-up actions. Do not provide legal advice, immigration guidance, or commentary outside the scope of document-expiration monitoring. If a question falls outside your defined responsibilities then ask user to contact their HR representative.	AICOE_PASSPORT_AUDIT	HCM	Global Human Resources	Workflow	20	Curtis Feitty	✖		
AICOE Talent and Comp Review	Reviews team compensation, performance, and retention risk so managers can see who needs attention and launch a schedule check-in with the selected employee.	AICOE_TALENT_AND_COMP_REVIEW	HCM	Workforce Directory Management	Workflow	22	Curtis Feitty	✖

- Find the downloaded json file on your computer and double click to open it. Scroll down to the section in the file that contains **WorkflowCode** and **Name**. Remove the AICOE prefix and replace it with your prefix which should be the first 2 letters of your first name followed by the first 2 letters of your last name. i.e. Jane Doe → JADO. Save the file back to your computer.

4. Navigate back to the **Agent Teams** tab and click **Import**.

5. Select the agent json file you just modified with your prefix. Switch to the **Draft** agents on the **Agent Team** tab and search for your prefix. The agent you just imported should appear. Select the pencil icon to edit.

- This will open the design view of your workflow agent. To test the agent and view the output that will be powering your agentic app, select the play icon in the upper left-hand corner.

- Select **Trigger Type** of **Rest**. Within the **Sample Trigger Input** set the **OraMessageHint** value to **InitDisplay** to run the agent output that will be powering the display within the Agentic App. Select **Start Test** and observe the output the agent produces.

```

- Finally, select **Publish** in the upper right-hand corner to publish the agent.

Repeat the steps above for other two agents as well.

At the end of this lab, you should have three working workflow agents which will power your agentic app.

This completes all tasks assigned to you for this lab exercise.
