Lab Objectives

In this lab, participants will test the Ask Oracle functionality within an Agentic App, find the agent team and prompt that controls the Ask Oracle functionality, and change the prompt responsible for the Ask Oracle responses.

By the end of this lab, participants will be able to:

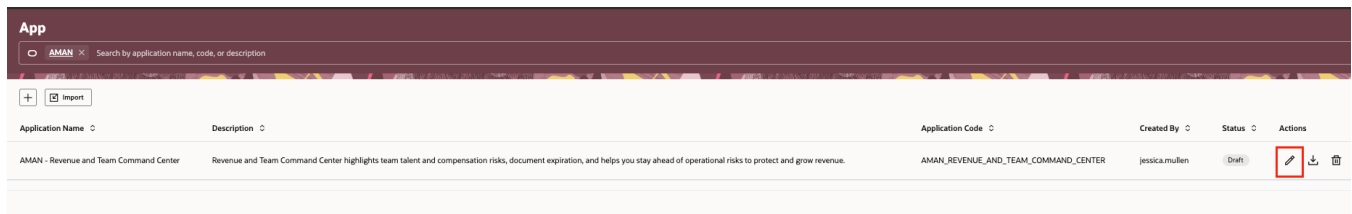

- Ask a question in the app via Ask Oracle
- Understand what agent team prompt is used for Ask Oracle
- Change the agent team prompt to receive better answers

Exercise – Observing and Modifying Query Prompt for Ask Oracle in Agentic Apps

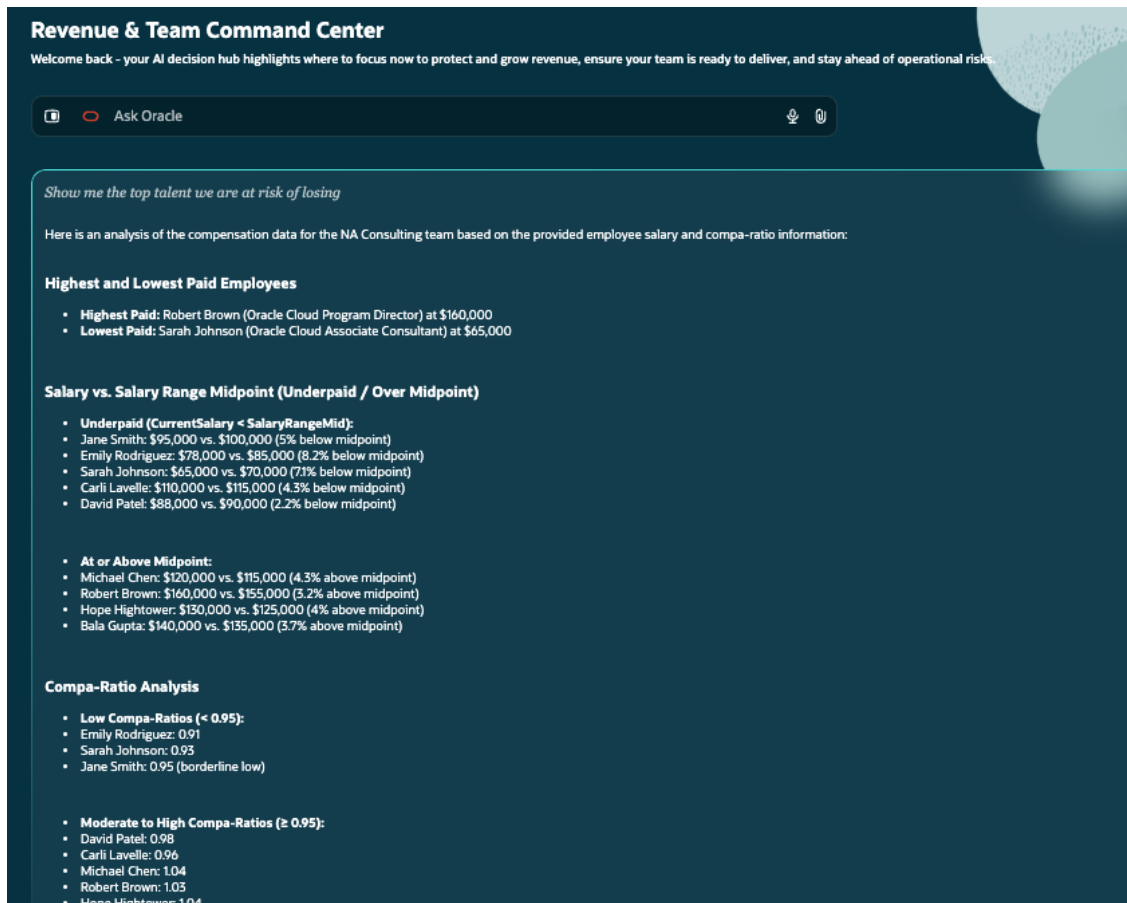

In this exercise, we will observe and make edits to a prompt within a workflow agent to control the behavior of the **Ask Oracle** query functionality within the Agentic App.

Login to the lab environment using the credentials provided. **Make sure to use your assigned user.**

1. In **AI Agent Studio**, go to the **Apps** tab and search for the prefix you have given your app [XXXX] within the **published** agents. Select the pencil icon to the right-hand side to edit your app.

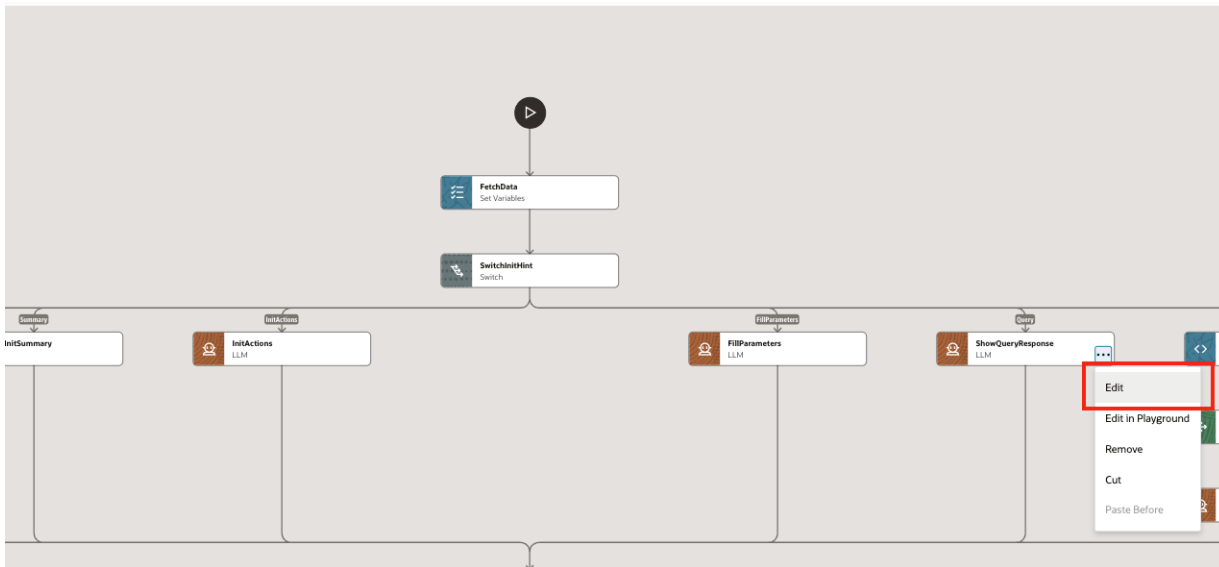

2. Find the **Ask Oracle** bar at the top of the screen and ask, “**Show me the top talent we are at risk of losing**”
Notice how the response does not really address that specific question, it just provides a data overview of the people on the team.

- Let's take a look at the prompt within the agent team that should provide the answer to this question. Go to the **Agent Teams** tab and search for the prefix you have given your agents [XXXX] within the **published** agents. Select the pencil icon next to the agent titled [XXXX] **Talent and Comp Review** to edit the agent.

Agent Team Name	Description	Agent Team Code	Family	Product	Type	Version	Created By	Custom Agent...	Tags	Actions
AMAN AICOE Deal Risk Agent	The Deal Risk Agent looks at opportunity activity through a risk lens. It identifies stalled opportunities, overdue deals, and competitive threats, helping sales leaders quickly understand where revenue is at risk and where follow-up urgency is highest. Instead of tracking every opportunity, it highlights the deals that need attention most, using severity signals such as STALLED, OVERDUE, and COMPETITIVE to surface the highest-risk opportunities for review.	AMAN_AICOE_DEAL_RISK_AGENT	CK	Sales Force Automation	Workflow	9	Jessica Mullen			
AMAN AICOE Passport Audit	You are an HR specialist focused exclusively on monitoring passport and work-permit expiration dates. Your role is to review only the data provided to you and respond strictly to questions related to document expiration, upcoming deadlines, and required follow-up actions. Do not provide legal advice, immigration guidance, or commentary outside the scope of document-expiration monitoring. If a question falls outside your defined responsibilities then ask user to contact their HR representative.	AMAN_AICOE_PASSPORT_AUDIT	HCM	Global Human Resources	Workflow	5	Jessica Mullen			
AMAN AICOE Talent and Comp Review	This is my description.	AMAN_AICOE_TALENT_AND_COMP_REVIEW	HCM	Workforce Directory Management	Workflow	14	Curtis Felty			

- The **oraMessageHint** that controls the **Ask Oracle** is **Query**. Edit the node called **ShowQueryResponse** to view the prompt that is responsible for powering the **Ask Oracle** content from this agent.

- Take a moment to review the prompt. Can you identify what context is missing that makes it so the **Ask Oracle** function within the app is not directly answering the question that was asked? Take a moment to add additional context as well as provide a role and a tone for the agent. You can use the syntax guide on the right-hand side to bring in context.

Home ShowQueryResponse Code SHOWQUERYRESPONSE Error Handler

Prompt
Inputs
- **Query Data** {{context.\$variables.CompPerformancePayload}}

You OWN the following topics:
- Salary data (CurrentSalary)
- Salary comparisons (highest, lowest, averages)
- Compa-ratio analysis
- Salary vs. range midpoint (underpaid / over midpoint)
- Pay equity observations within the team
- Compensation risk (e.g., high performers below midpoint, low compa-ratio)

You SHOULD answer questions like:
- Who is underpaid relative to their salary range?
- Which employees have low compa-ratios?
- Who are the highest and lowest paid employees?
- Are there any compensation risks in the team?

You MUST NOT answer questions about:
- Organizational structure or reporting hierarchy
- Hiring, recruiting, or open roles
- Employee absences or availability
- General HR metrics not tied to compensation

When responding:
- Be analytical and precise
- Use calculations where relevant
- Highlight risks and notable insights
- Keep answers concise and business-focused
- Only answer questions that can be answered with the Query data

Type {} to start using context-sensitive expressions.

- ☐ Sankey

7. Click **update** and then **publish** to save your changes.

8. Navigate back to your app and ask the same question as before, “**Show me the top talent we are at risk of losing**” within the **Ask Oracle** bar. Notice now how the returned answer addresses my specific question much clearer.

Revenue & Team Command Center

Welcome back - your AI decision hub highlights where to focus now to protect and grow revenue, ensure your team is ready to deliver, and stay ahead of operational risks.

Ask Oracle

Show me the top talent we are at risk of losing

Top Talent at Compensation Risk

Here is an analysis of the top talent at risk of compensation-related loss based on performance and compa-ratio indicators. These employees are high performers with compa-ratios below 1.0, indicating they are paid below their salary range midpoint despite exceeding expectations, which poses a retention risk.

Jane Smith and Emily Rodriguez are high performers with compa-ratios below 1.0, indicating they are underpaid relative to their salary range midpoint. This compensation gap represents a risk for losing key talent unless addressed.

Name	Job Title	Current Salary (USD)	Salary Range Midpoint (USD)	Compa-Ratio	Performance Rating	Location
Jane Smith	Oracle Cloud Senior Implementation Consultant	\$95,000	\$100,000	0.95	Exceeds Expectations	Chicago
Emily Rodriguez	Oracle Cloud Financials Implementation Consultant	\$78,000	\$85,000	0.91	Exceeds Expectations	Austin

This completes all tasks assigned to you for this lab exercise.
